ReportPortal.io   Cheat Sheet

The most common list of commands

Export as env var:

```
export RP_PRJ=$(docker ps --filter="name=api" --format="{{.Names}}" | sed 's/\(.*\)_api_[0-9]*/\1/')

export RP_NET=$(docker inspect ${RP_PRJ}_mongodb_1 | jq '.[0].NetworkSettings.Networks' | jq -r 'keys[]')
```

Install/restart ReportPortal:

```
docker-compose -p $RP_PRJ up -d --force-recreate
```

Show all logs:

```
docker-compose -p $RP_PRJ logs
```

Show specific logs:

```
docker-compose -p $RP_PRJ logs <name, e.g. api>
```

Delete everything except data:

```
docker-compose -p $RP_PRJ down -rmi -v --remove-orphans
```

Backing UP:

```
docker run --network ${RP_NET} --rm -v ${PWD}/dump2:/db_dump mongo  mongodump -h mongodb --db
reportportal --out/db_dump/
```

Restore backup:

```
docker run --network ${RP_NET} --rm -v ${PWD}/dump2:/db_dump mongo  mongorestore -h mongodb --db
reportportal/db_dump/reportportal
```
